

Nureva® Console

Nureva Console is a secure, cloud-based platform that makes it easy to manage and monitor your Nureva products from anywhere. It's included with every Nureva device. Additional advanced features are available with our Nureva Pro service plan (2 years included with purchase).

Remote management

Save time and effort needed to manage your systems – without requiring additional servers. Nureva Console lets you log in from anywhere and see at a glance if devices require your attention. You can also make changes right from the platform, avoiding the need to go room to room. When device updates are available, it's easy to bulk install them with just one click.

Intelligent monitoring

Quickly resolve problems before they impact your spaces. Email alerts and a room status dashboard mean you'll always know if updates are available or if any devices have been disconnected. You can also monitor any USB-connected camera right from Nureva Console.

Informed decision-making

Get the information you need to gain a deeper understanding of your rooms. Access to background noise charts, sound location charts and signal-to-noise ratio (SNR) levels uncovers rooms that may benefit from acoustic treatment. In addition, historical usage data lets you know how and when rooms are being used so you can identify opportunities for optimization or further investment.

Automated camera switching

Set up zones to automate switching of your USB or HDMI cameras. When someone starts speaking, our sound location data activates the camera mapped to the zone in which the voice is detected. You can mix and match the cameras as you like – no need to standardize on one brand. Available with the HDL410 system.

Features

- **A color-coded dashboard** makes it easy to see device status at a glance, including available updates.
- **Asset management features** let you name and tag devices and classify your rooms by device type and size.
- **Device settings** enable you to configure your systems by turning on Adaptive Voice Amplification, choosing speaker presets and more.
- **Email alerts** let you know instantly if there are issues in your rooms so you can resolve them right away.
- **Coverage map** generates a real-time visualization of all sound events in a room so you can see where voices are being picked up (available with the HDL410 system).
- **Analytics and insights** equip you with usage and acoustic performance data to identify potential improvements (up to 12 months of data available with Nureva Pro).
- **Camera zones** simplify the setup of automated switching with any two or three cameras (available with the HDL410 system).

We are Nureva

We believe that amazing things happen when people come together. They imagine greater possibilities, create better solutions and find greater joy in how they work and learn. It's why we create and support truly original solutions that make it astonishingly easy for our customers to connect and collaborate no matter where they are.
