

HDX audio series for higher education

Equip your classrooms, lecture halls and meeting rooms with pro-quality audio — without DSP programming or complicated setups. Get essential higher education AV features in a modular solution with built-in intelligence, making it adaptable and easy to scale across all your larger spaces.

Classes and lectures

- Helps instructors teach naturally
- Connects remote and in-room students
- Includes assistive listening support

Flexible learning

- Adapts to room layout changes
- Picks up voices everywhere
- Supports divisible room setups

Faculty meetings

- Simplifies staff collaboration
- Saves on travel time and cost
- Delivers clear audio for AI agents

Key features

Full-range distributed audio

Experience rich, room-filling sound that intelligently adapts so everyone hears clearly, even in lecture halls and larger classrooms.

Full-room mic coverage

Pick up every voice clearly, no matter where instructors move or students sit. HDX is also ideal for lecture capture and AI transcription.

Adaptive Voice Amplification

Easily amplify an instructor's voice in the room using an external mic, without affecting full-room mic pickup for remote students.

Adaptive Voice Lift

Subtly boost instructor voices across large classrooms and lecture halls, without external microphones, so students at the back can hear (in beta).

Built-in assistive listening

Support higher ed students with hearing challenges through built-in *Auracast*™ broadcast audio (in beta). They can use their own hearing aids or headphones.

3D sound location data

Combine your cameras with our 3D sound location data for automated tracking and switching so remote students always get the best view.

HDX series

Modular, adaptable audio

Audio bar: Wall-mounted bar that combines speakers and microphones.

Microphone pod: Flexible 2D mic array that strengthens pickup and adds voice lift.

System hub: Multifunction AV hub that eliminates the need for separate DSPs.

Choose from five plug and play configurations available for rooms up to 40' x 60' (12.2 x 18.3 m). Standardizing across a large-scale deployment has never been easier.
