

Full-featured HDX audio series

Enhance the listening experience for everyone in larger meeting, training and learning spaces. The HDX series delivers full-range distributed audio, remarkable mic pickup and advanced AV features in a modular, intelligent solution that doesn't require DSP programming.

Meetings and town halls

- Simplifies hybrid collaboration
- Delivers clear audio for AI agents
- Minimizes technical distractions

Classes and training

- Helps make content more engaging
- Keeps remote learners connected
- Includes assistive listening support

Flexible collaboration

- Adapts to room layout changes
- Picks up voices everywhere
- Supports divisible room setups

Key features

Full-range distributed audio

Experience rich, room-filling sound that intelligently adapts so everyone hears clearly, even in larger spaces.

Full-room mic coverage

Pick up every voice clearly, no matter where people sit, stand or move. HDX is also ideal for AI meeting transcription.

Adaptive Voice Amplification

Easily amplify a presenter's voice in the room using an external mic, without affecting full-room mic pickup for remote participants.

Adaptive Voice Lift

Subtly boost presenter and instructor voices across large meeting and learning spaces, without external microphones, so people at the back can hear (in beta).

Built-in assistive listening

Support people with hearing challenges through built-in *Auracast*™ broadcast audio (in beta). They can use their own hearing aids or headphones.

3D sound location data

Combine your cameras with our 3D sound location data for automated tracking and switching so remote attendees always get the best view.

HDX series

Modular, adaptable audio

Audio bar: Wall-mounted bar that combines speakers and microphones.

Microphone pod: Flexible 2D mic array that strengthens pickup and adds voice lift.

System hub: Multifunction AV hub that eliminates the need for separate DSPs.

Choose from five plug and play configurations available for rooms up to 40' x 60' (12.2 x 18.3 m). Standardizing across a large-scale deployment has never been easier.
