

# Nureva™ Span™ Workspace

## For accelerated visual collaboration

Bridge the gap between paper and pixel to accelerate your essential collaborative processes. With Span Workspace, teamwork is fast, fluid and effective – whether you're all in the same location or dispersed around the world.

Span Workspace is a cloud-based solution that lets you create an unlimited number of digital canvases to visualize ideas and map processes. Anyone with a subscription can invite other users or guests to a canvas, and everyone can work together on it in real time, using any device. Familiar tools, including sticky notes, sketches, images and templates, help you shift from paper to digital collaboration without compromising your proven processes.

With expansive canvases and easy-to-use tools, Span Workspace is the virtual collaboration solution your team has been looking for.

### Create content

Share information using a variety of flexible tools. Notes let you quickly add ideas to a canvas, while text boxes allow more room to capture complex thoughts. Sketches are ideal for drawing and wireframing, and images and PDFs can be imported and annotated. All can be moved, edited, hyperlinked, duplicated and grouped as needed. In addition, screen sharing enables information from multiple live applications to be shared to the same canvas, creating an even more dynamic collaboration space.

### Organize everything

Use groups to keep your content accessible and organized. Subgroups and color coding help everyone see at a glance how ideas fit together. For more complex tasks, Span Workspace makes it easy to create custom templates from scratch or convert your paper-based templates into dynamic digital tools. You can also choose from a selection of commonly used business templates.

### Collaborate anywhere

Contribute to a canvas anytime, anywhere and on any device. Synchronous and asynchronous inputs are possible from all team members, whether they're colocated or working at a distance. When collaborating in real time, you can follow a leader through a canvas or explore on your own. And using QuickShare lets people without a Span subscription share their ideas without logging in.

### Optimized for the Nureva Wall

Using Span Workspace with a Nureva Wall gives teams even more room to visualize ideas and processes. It combines an ultra-short-throw HD projector with a capacitive touch surface to transform virtually any wall into a space for rich, visual collaboration. For more details, visit [nureva.com/visual-collaboration/nureva-wall](http://nureva.com/visual-collaboration/nureva-wall).

### BENEFITS

**Encourages big-picture thinking** • Working with ideas on an expansive canvas helps team members spot patterns and connect ideas

**Accelerates collaborative processes** • Digitally transform agile, lean, consulting, design thinking and other processes with familiar tools that you can tailor to your needs

**Enables access anywhere** • Cloud-based software lets people work together in real time, no matter where they are

**Reduces groupthink** • Users can create and organize content in their personal tray before sharing it to the canvas

**Simplifies sharing** • With access to guest accounts and the QuickShare feature, it's simple to gather feedback and ideas from a wide range of people

**Works with all devices** • Team members can use Span Workspace on their smartphones, tablets, Chromebook™ computers, laptops, interactive displays and the Nureva Wall

| Tools to create       |   |
|-----------------------|---|
| <b>Canvas</b>         | Create a blank canvas to capture and organize ideas. Canvases start at 40' (12.19 m) but can be extended to 200' (60.96 m).     |
| <b>Notes</b>          | Type and ink on the same digital sticky note. Duplicate, choose from 24 colors or add a hyperlink.                              |
| <b>Text box</b>       | Enter up to 2,000 characters of text and resize as needed. Duplicate, choose from 10 text colors or add a hyperlink.            |
| <b>Sketch</b>         | Open a blank sketch for quick inking. Duplicate, ink in 10 colors, erase or add a hyperlink.                                    |
| <b>Content import</b> | Import JPG, PNG and multipage PDF files. Duplicate, resize or add a hyperlink. Ink on images and on any page of a PDF document. |
| <b>Copy and paste</b> | Copy and paste content from one canvas to another.  |

| Tools to organize             |  |
|-------------------------------|--|
| <b>Groups</b>                 | Create a group to organize content. Drag items in and out or resize as needed. Assign a group color and any note added will turn that color. |
| <b>Customizable templates</b> | Convert images into dynamic templates, or choose from a selection of commonly used business templates.                                       |

| Tools to share        |   |
|-----------------------|---|
| <b>Share a canvas</b> | Invite team members to collaborate. Set individual permission levels on a canvas to view, contribute, edit or manage.             |
| <b>Follow me</b>      | Let everyone follow your view as you pan the canvas and touch items, making it easy for distributed teams to stay on track.       |
| <b>Guest access</b>   | Invite guests to view, contribute to or edit any canvas – no Span Workspace account required.                                     |
| <b>QuickShare</b>     | Enable anyone with a device to contribute notes and images without logging in by scanning a QR code or entering an access number. |
| <b>Screen sharing</b> | Share your screen to a canvas while others are also sharing their screens.  |
| <b>Export</b>         | Export any canvas as a PDF or an Excel® file.   |

| Tools to manage                   |   |
|-----------------------------------|---|
| <b>Duplicating and versioning</b> | Quickly duplicate a canvas or save a view-only version of a canvas.   |
| <b>Canvas list</b>                | Add tags to canvases to organize them. Star your favorites, archive completed canvases or move them to the trash.     |
| <b>User groups</b>                | Administrators can create user groups in Span Workspace, and then anyone can easily invite groups to the same canvas. |
| <b>SSO integration</b>            | Administrators can set up single sign-on for Span Workspace through Microsoft® Azure® AD®, Ping® or Okta.             |

## WALL CLIENT ADDITIONAL FEATURES

(for the Nureva Wall or interactive displays)

- Access content from other applications, including web browsers and documents, without leaving Span Workspace. Capture content into the canvas and add annotations.
- Lock a canvas in place and then easily unlock when panning is needed

## MINIMUM OPERATING REQUIREMENTS

### Wall client

Windows® OS 10 or higher (64 bit only)  
.NET framework 4.7 or higher

### Computer browser

Chrome™ v72+, Safari® 10+  
(running Mac OS X 10.10+)

### Mobile browser

iOS Safari 10, iOS Chrome 10, Android™ 7
